

Fund Objective

The Rock Capital IP Worldwide Flexible Fund is a moderate to high risk, flexible fund. The objective of this portfolio is to achieve capital appreciation over the medium to long term.

Fund Universe

Investments to be included in the ROCK CAPITAL IP WORLDWIDE FLEXIBLE FUND will, apart from assets in liquid form, consist of securities and financial instruments across the equity, fixed interest and property markets. The portfolio will typically be highly exposed to equities but the Portfolio Manager will have complete flexibility to vary the exposure to different asset classes as economic conditions vary. The portfolio will typically not hold more than 20 securities at any time.

Manager Commentary

The first quarter of 2021 has drawn to a close and will be remembered by the pivotal role the United States played in buoying the markets. Even though the global market usually follows America's cue, this quarter it was even more so. The year started off on a bad note when armed rioters stormed the Capitol Building in Washington. However, market jitters were short lived, and people were more interested in Biden's \$1.9 trillion stimulus package. After the first successful stimulus, the Biden administration is currently working on a massive Infrastructure Bill valued at \$2 trillion which enjoys broad support among the American people.

The Federal Reserve has once again reiterated their Dovish stance and it appears ultra-low interest rates are here to stay for the short to medium term. This unprecedented fiscal and monetary easing has pushed the stock markets around the world higher and placed a lot of pressure on the US Dollar, resulting in the ZAR trading at R14.50 against the Dollar at the time of writing. The relative cheapness of South Africa's oil imports combined with the high prices of hard commodities (such as Gold, Platinum, Palladium, Iron Ore, Coal), which South Africa is a net exporter of, has resulted in South Africa running a healthy trade surplus and has supported the strengthening of the Rand.

Fund Information

Portfolio Manager:	Rock Capital Management (Pty) Ltd
Inception Date of Fund:	01-Oct-2014
Inception Date of Class:	01-Oct-2014
Benchmark:	CPI + 3%*
Classification:	Worldwide - Multi Asset - Flexible

Growth of a R 100 000 Invested since Inception

Volatility is a statistical measure of the dispersion of returns for a given security or market index.

Tracking error is a measure of the risk in an investment portfolio that is due to active management decisions made by the portfolio manager; it indicates how closely a portfolio follows the index to which it is benchmarked.

Information ratio is a measure of the risk-adjusted return of a portfolio. In this case, it measures the active return of the manager's portfolio divided by the amount of risk that the manager takes relative to the benchmark.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Alpha is a measure of the active return on an investment. It represents the excess returns of a fund relative to the return of a suitable benchmark.

Disclaimer and Disclosures

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the manager. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager retains full legal responsibility for the fund, regardless of Co-Naming arrangements. Transaction cut off time is 14:30 daily. Each portfolio may be closed for new investments. Valuation time is 15:00 (17h00 at quarter end). Prices are published daily and available newspapers countrywide, as well as on request from the Manager. IP Management Company (RF) Pty Ltd is the authorised Manager of the Scheme – contact 021 673 1340 or clientservices@ipmc.co.za. Standard Bank is the trustee / custodian – contact compliance-IP@standardbank.co.za. Additional information including application forms, the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from clientservices@ipmc.co.za. IP Management Company is a member of ASISA. A statement of changes in the composition of the portfolio during the reporting period is available on request. The performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

The portfolio may include foreign investments and the following additional risks may apply: liquidity constraints when selling foreign investments and risk of non-settlement of trades; macroeconomic and political risks associated with the country in which the investment is made; risk of loss on foreign exchange transactions and investment valuation due to fluctuating exchange rates; risk of foreign tax being applicable; potential limitations on availability of market information which could affect the valuation and liquidity of an investment. All of these risks could affect the valuation of an investment in the fund.

The total expense ratio (TER) was incurred as expenses relating to the administration of the financial product. Transaction costs (TC) relate to the buying and selling of the assets underlying the financial product. Total Investment Charge (TIC) is the value of the financial product incurred as costs relating to the investment of the financial product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts the financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time such as market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Annualised returns is the weighted average compound growth rate over the performance period measured. Fund returns shown are based on NAV-NAV unit pricings calculated from INET / IRESS for a lump-sum returns is the weighted average compound growth rate over the performance period measured. Fund returns shown are based on NAV-NAV unit pricings calculated from INET / IRESS for a lump-sum investment with income distribution reinvested (after fees and cost). Performance numbers and graphs are sourced from Global Investment Reporting (Pty) Ltd.

The Effective Annual Cost (EAC)

The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. You can contact clientservices@ipmc.co.za or call us on (021) 673-1340 for an Effective Annual Cost disclosure statement. Please visit <http://www.ipmc.co.za/effective-annual-cost> to address the EAC illustrator.
